Alera® Maxxline 250 mattress

Code (s) : 1556, 1557, 1558

The Alera® MaxxLine 250 mattress is made up of three layers of hyperelastic foam that provide optimum pressure relief for individuals up to 250kg. The top two layers have longitudinal and diagonal castellations to support a range of profiling and bed positions. They also help to create a ventilation system, allowing the mattress to breathe, and ensures that it maintains a suitable microclimate. This mattress comes with a waterproof cover that is vapour permeable to protect the mattress while ensuring the occupant is comfortable.

FEATURES

- Three-layered hyperelastic foam core with longitudinal and diagonal intersections
- Optimum pressure relief and minimum shear force (below 2.4kPa pressure)
- Super soft zones for head and heel relief
- Two-way stretch, breathable and waterproof, with ultrasonically welded seams and a concealed zip
- Cover is chemically and thermally treated according to the directives of the Robert Koch Institute, and is virus and bacteria proof
- Easy clean and care PU-Tex cover can be removed and washed up to 95˚C (disinfectant cleaning and autoclavable)
- Designed for people at high risk of pressure injuries, up to stage 4 (EPUAP)

Alera® Maxxline 250 mattress

SPECIFICATIONS

Code(s)	1556	1557	1558
Option	Super single	Double	Queen
Overall dimensions	W 1100mm L 2000mm H 180mm	W 1400mm L 2000mm H 180mm	W 1500mm L 2000mm H 180mm
Safe working load	250kg	250kg	250kg
Product weight	22kg	24kg	30kg
